## **Incineration must be opposed**

Thu Oct 11, 2007

To the editor:

What are our politicians thinking?

Citizens are creating waste that can't be recycled and there is no more space for landfill, so regional council is planning to burn it so that it becomes waste in the air or gets washed into the water that we drink?

This is appropriate when we have banned smoking in public places and plan to shut down coal-fired power plants because of the threat to our health?

One of your recent editorials suggested that we demonstrate our feelings come the next municipal election.

I don't think we can afford to wait that long to ensure that the voices in our community are heard.

Besides, Roger Anderson, our regional chairman who has been on record as stating that the energy from waste facility will proceed whether or not Clarington is a willing partner, isn't even elected.

Pam Callus
